## 📄 Professional Summary

Data Analyst with hands-on experience in **SQL Server, Power BI, and Python**, specializing in data modeling, ETL, dashboard development, and business analytics. Built analytics solutions on datasets ranging from business operations to **17M+ flight records** and recognized as **Best Mentor** at Microsoft Student Club (KFS) for mentoring students in SQL and Power BI. Finance & Investment background with strong analytical and problem-solving skills.

## 🎓 Education

**Bachelor's in Commerce**, *Finance & Investment Cairo University, Faculty of Commerce* 09/2023 – 09/2027

- Relevant coursework: Financial Analysis, Investment Management, Business Statistics.

## 💼 Professional Experience

**Data Analysis Technical Mentor**, *Microsoft Student Club (KFS)* 02/2026 – 05/2026 | Remote

- Awarded **Best Mentor** for outstanding mentoring and student support.
- Delivered 5+ SQL & Power BI training sessions to 10–20 students covering advanced queries, window functions, Power Query, data modeling, and SQL Server–Power BI integration.
- Provided hands-on mentoring through assignments, code reviews, and one-on-one technical feedback.

**Data Analysis Intern**, *Orange Digital Center Egypt & Instant Software Solutions* 01/2026 – 02/2026 | Cairo, Egypt

- Gained hands-on experience in SQL, Power BI, data modeling, and Python through intensive project-based training.
- Delivered two end-to-end analytics projects (ERD design → SQL Server → Power BI dashboards)
- Presented weekly analytical findings through structured presentations.

## 📁 Projects

**Supply Chain Intelligence Platform** 🔗

- Engineered a SQL galaxy-schema data warehouse and built 4 interactive Power BI dashboards analyzing 82K+ B2B orders across sales, retailer behavior, logistics, and financial health.
- Applied advanced DAX modeling — RFM segmentation, cohort retention, Pareto analysis, and revenue concentration — to surface actionable business insights from raw transactional data.
- Diagnosed and quantified critical data-quality issues invisible to standard reporting, including 4,461 status-inconsistent orders and 2,044 paid-but-undelivered transactions, through custom DAX/SQL logic.

**Technologies:** SQL Server · Power BI · DAX · Power Query · ETL · Galaxy Schema · RFM

**BTS Aviation Analytics | Power BI** 🔗

- Built an aviation analytics dashboard on 17M+ BTS flight records covering delays, cancellations, diversions, and airline performance.
- Designed a Galaxy Schema with multiple fact tables and developed 30+ DAX measures for operational KPIs.
- Cleaned and transformed large-scale flight data using Power Query to improve data quality.
- Delivered operational insights into delay patterns, airline reliability, and airport performance.

**Technologies:** Power BI, Power Query, DAX, Galaxy Schema

**Superstore Sales Analytics** 🔗

- Built interactive dashboards analyzing sales, profitability, customer behavior, and discount strategies.
- Performed customer profitability and what-if analysis, projecting ~\$584K potential profit improvement.
- Proposed data-driven pricing recommendations and an A/B testing framework.

**Technologies:** Power BI, SQL Server, Power Query, DAX, Star Schema

## 🧠 Skills

- **Languages:** SQL, Python
- **Libraries:** Pandas, NumPy, Matplotlib, Seaborn
- **BI & Analytics:** Power BI (DAX, Power Query), Excel
- **Data:** ETL, Data Transformation, ERD, Dimensional Modeling (Star & Galaxy Schema), KPI Development, Dashboard Development, Data Visualization
- **Tools:** SQL Server, SSMS, Power BI Desktop, Jupyter Notebook, Git, GitHub
- **Soft Skills:** Analytical Thinking, Problem Solving, Technical Mentoring, Presentation & Storytelling
